General Chair:
Juan Carlos Miguez, IEEE Uruguay
j.miguez@ieee.org

Technical Program Chairs:

Daniel Slomovitz, UTE Laboratory, UY
Mario Vignolo, UDELAR Uruguay

International Committee:
Luis Ochoa, The University of Manchester, UK

Hugh Rudnick, PUC, Chile

Nelson Kagan, USP, Brasil
Renato Cespedes, RCGSAS, Colombia
Nelson Segoshi, PES Region 9

Publication & Publicity Chair:
Pablo Thomasset, IEEE UY PES Chapter
pjthomasset@ieee.org

Important Dates:

March 15, 2015
EXTENDED ABSTRACT Submission Deadline

June 15, 2015
Notification of paper ACCEPTANCE

August 15, 2015
Camera-ready / FINAL PAPER Submission Deadline

Sponsored By:

IEEE PES Power & Energy Society

Patrons:

CALL FOR PAPERS

The IEEE PES Conference on Innovative Smart Grid Technologies (ISGT-LA 2015) Latin American, sponsored by the IEEE Power & Energy Society (PES) and hosted by IEEE URUGUAY SECTION and PES local CHAPTER, will be held on OCT 5, 6 and 7th, 2015. The Conference will be a forum for the participants to discuss state-of-the-art innovations in Smart Grid technologies, to attend tutorials and Industry Panels.

Conference TOPICS are:

- Wind Integration, Renewable Energy Sources and Smart Grid (Hydro, Tidal, Wind, Solar and Electric Vehicles, Storage technologies), resources forecast (water, wind, weather), Environmental Impacts
- Energy and Distribution Management Systems, Wide Area Monitoring, Control and Operation (SCADA)
- Computational methods and optimization techniques in Smart Grids; Big Data, Massive Grid Data, Data Mining of Smart Grid, Geographic information system (GIS) technology and Smart Grid, Multi-agent Based Applications for Smart Grids
- Smart Grid Impact on Electric Power Systems (Generation, Transmission and Distribution), Grid modeling, analysis and simulation, real time and co-simulation, Stability
- Demand Response, Demand side management, Customer aspects, user behavior and Flexible Demand,
- Smart Grid Information and Communications Technologies (ICTs), Communications, Operations Support System (OSS), System Architecture, WANs and LANs Networks, 3G/4G networking. Control and Information Systems: Cyber Security Systems, Intelligent Monitoring and Outage Management
- Power System Instrumentation and Measurements, Metering Infrastructure and Instrumentation, Components Reliability and Diagnostics, System and Components Asset Management
- Power Quality, Energy Efficiency and Smart Grid, Power Electronics Devices: modeling, application, control. FACTS: flexible alternating current transmission system power electronics and Smart Grid
- Protection in Energy Systems, PMUs and Wide Area Monitoring, IEC 61850, distributed IEDs, Synchrophasors in Distribution
- Smart Grids Interoperability; Regulation, Codes, Standards, Public Policies for implementation of Smart Grids,
- Home and Building Automation, Smart Cities, Cross Energy-domain solutions, Smart Sensors, Convergence of Smart Grid and the Internet of Things,
- Integration of Distributed Energy Resources, Distributed Generation, Islanded Systems and Microgrids: operation, control, monitoring and technologies, Climate change mitigation,
- Smart Grid Projects; Field Tests, large-scale demonstrations and deployment experiences, Future trends: technologies, researches, standards, incentives, opportunities
- Smart Grid Roadmaps; Smart Grid Infrastructure Investments, Planning and Budgets, Cost and Benefits Analysis, Grant Programs,
- Smart Grids and Electricity Markets; Impact of Smart Grids in Regulation and Energy Pricing, Economics and incentive Regulations for Smart Grids, Smart Grids and Sustainable Developement

Potential authors are invited to contribute submitting a 3 to 4 pages EXTENDED ABSTRACT (IEEE PES pg4 template) to EDAS sever (http://edas.info/N17139). At least one of the authors of an accepted paper must register and physically attend the Conference for its oral/poster presentation, inclusion in the Proceedings. Approved and showed papers in english, will be submitted to IEEE Xplore® Digital Library.
